LIFE SET FREE

TOWARDS A DRUG - FREE SOCIETY:  
CORNERSTONES OF SWEDEN'S SUCCESSFUL DRUG POLICY

LIFE SET FREE

## Background

Drug use in Europe has been expanding over the past three decades. More people experiment with drugs and more people become regular users, with all the problems this entails for already strained national health systems. There are thus suggestions, at the European level, that drug policies have failed to contain a widespread problem.

Sweden is a notable exception.

- Drug use levels among students are lower than in the early 1970s
- Life-time prevalence and regular drug use among students are considerably lower than in the rest of Europe
- Life-time prevalence and regular drug use among the general population are considerably lower than in the rest of Europe
- Drug abuse is ever decreasing in Sweden contrary to the European trend

## The Swedish vision

Swedish drug control policy is guided by the vision and the ultimate goal of achieving a drug-free society and the unequivocal rejection of drugs, their trafficking and abuse. Swedish drug control policy is guided by solidarity with disadvantaged and vulnerable members of society. People are entitled to a life of dignity and a society, which safeguards health, prosperity, security and safety of the individual, family and community. Therefore the vision is that of a society free from narcotic drugs.

## Overriding task

The overriding task of Swedish drug policy is to prevent abuse. Preventive measures shall strengthen the determination and ability of the individual to refrain from drugs.

LIFE SET FREE

## International context

The Swedish drug policy is fully in line with the three United Nations Conventions on drugs:

- 1961 Single Convention on Narcotic Drugs,
- 1971 Convention on Psychotropic Substances
- 1988 United Nations Convention Against Illicit Traffic in Narcotic Drugs and Psychotropic Substances

The International Narcotics Control Board carried out a mission to Sweden in 2004 and commended the Government for its commitment and efforts in the fight against drug abuse and illicit trafficking, in line with the international drug control treaties. Sweden has shown that it is possible to combine a modern welfare state with effective methods to prevent non-medical drug use.

### Widespread Public support

Public opinion: strong political consensus and support from the public for a comprehensive and restrictive drug policy based on the UN conventions, which include both supply- and demand reduction

## The Swedish context

4 contextual factors for successful drug policy

### 1) Distribution of prosperity:

Income inequalities, which often go hand in hand with criminal activities including drug trafficking, are low.

### 2) Health literacy:

International surveys show that the Swedish population is particularly health-conscious, therefore less prone to large-scale drug use and inclined to lifestyle choices that promote health and well-being.

### 3) Employment rates:

Unemployment, including youth unemployment, is below the European average. This reduces the risks of substance abuse.

### 4) Political commitment and political will:

There's widespread consensus across political parties, civil society, labour unions and the business sector on Sweden's political commitment to a society free from drugs; political leaders continuously express that political will to prevent and reduce harm caused by narcotic drugs remains very strong from both the Parliament and the Government.

## Behindertenrechtskonvention der Vereinten Nationen

- 2009 von Deutschland ratifiziert, Schweiz?
- Stichwort: Inklusion

# Inklusion

## Was ich sagen wollte

1. Es ist wichtig, seine Geschichte (ganz) zu kennen
2. Die Arbeit von IOGT International heute ist vielfältig, angepasst an die jeweiligen Anforderungen – die Basis ist die Abstinenz der einzelnen Mitglieder in den Mitgliedsorganisationen. IOGT Schweiz spielt eine wichtige Rolle.
3. Geschichte ist nur dann hilfreich, wenn man sie kennt und aus ihr lernt, wenn man etwas weiter entwickelt.
4. Unsere Gründungsväter haben sich für die Entwicklung der Menschenrechte eingesetzt und erkannt, dass Suchtmittel auf dem Weg dahin schwächen und stören.
5. Helfen wir Menschen weiterhin auf dem Weg dahin. Das ist gut für sie persönlich, für ihre Familien, ihre Kinder und die Gesellschaft als Ganzes.

Herzlichen Dank für
